AVANTAGE[®]

IN LANDSCAPING

GET A HEAD START ON LANDSCAPING WITH AVANT

Avant is a powerful landscaper's tool that will impress both the operator and the customer. We have created an amazingly versatile loader that will take care of both landscaping and maintenance of your garden and green areas.

With Avant loaders and attachments you can create smooth surfaces with an astonishing finish that will keep on impressing operators and customers alike!

Our comprehensive and extensive selection of loader attachments will cover all your landscaping & maintenance needs.

ANY SURFACE

Articulated steering and light frame allow Avant loaders to be driven gently on delicate surfaces such as grass, building foundations and paving. There's also plenty of power for all the heavy-duty jobs required, such as handling fertilizer sacks and stone pallets.

Our loaders' thrust power is among the best for their size. Spreading surface materials, such as crushed stone and stone dust, is quick and effective with Avant.

Hydrostatic transmission and the joystick-operated telescopic boom add control precision and help you to create an exceptional finish.

VERSATILE AND EFFICIENT

In landscaping, work environments and sites can vary hugely from one project to another. When you need to move from one site to another in quick pace, easy transportability becomes a distinct advantage.

Our compact loaders can work in diverse environments and can be transported with a regular trailer with brakes.

No two days are the same when you're working with Avant: it can perform a multitude of jobs and serve a wide range of customers.

For all enquiries free call 1800 686 411 Australia wide or email sales@avantequipment.com.
Showroom located at 6 O'Neil Street, Unanderra, NSW. Onsite demo's on request.
